Volunteers Helping People See Better Around the World

Help Bring the World Into Focus— Donate Eyeglasses to Help Others See

For the needy in some countries, failing sight means blindness. Professional eye care is more than a gift—it is a miracle! You can be part of that miracle.

From Discards to Hope

Donations of discarded eyeglasses and sunglasses are transformed into a miracle for the poor.

Volunteer optometrists take recycled eyeglasses to other countries for free distribution to persons in need, regardless of age, race, gender, or religion.

Recycled sunglasses prevent eye disease and blindness caused by intense sunlight, wind, and dust in tropical and high altitude countries.

Each year, Project 20/20 eyeglasses and funds help over 1,000 children and adults receive the gift of better sight—at no cost to any of them! Over 25,000 persons see better since Project 20/20 began in 1993.

Please Donate Eyeglasses and Sunglasses

With Thanks! ...From all those who will be able to see better

Project 20/20 is a non-profit human service project of the United Methodist Church. Donated eyeglasses are prepared for medical teams that travel to countries that cannot provide eye care to the needy. This service to persons of all faiths is possible because of volunteers and contributions from many church denominations, community civic clubs, and the Southern College of Optometry. Please use this address to send eyeglasses, volunteer your time, or request information:
